I am open to what ever schedule works for all of you. My only limitation for now is the week of August 22. Mid September will start to look really beautiful in the Bristol Bay tundra.

Dan, Phil,

I suggest a series of teleconferences and a meeting in Anchorage (with overflight if possible). I think the teleconferences would let get started on planning for what we need do for the February assessment, and we could have a two full day working session to actually get some work done (or really define what is needed for February). Dan, I agree with you comment: I don't think any ideas that I may have should influence what you are doing for September. A schedule that would work for me is:

Conference calls the weeks of August 8 and 17.

Meeting in Anchorage: during one of the following weeks: August 29, September 12 or September 19.

I am very open to other suggestions. If this is something we want to do, we should get Glenn Suter involved in the planning.

We've started talking about meeting but haven't settled on anything.
Am I correct in assuming this will be a teleconference? Either way,
I'm generally available from August 6 through Sept 2, then available
again after September 11. What do you think, Jim?

Dan
